

Canada Diagnostic Centres is the premier outpatient provider of both diagnostic imaging and image guided procedures in Alberta, owning and operating 16 radiologist-led clinic sites in the Edmonton and Calgary metro areas. CDC offers a full range of services including MRI, CT, Ultrasound, Mammography, Xray, Bone Density, GI Fluoroscopy, image guided biopsies, and sophisticated pain management procedures.

We are a contracted provider of services to Workers' Compensation Board Alberta, the official diagnostic imaging provider to Alberta Ballet, and contribute to numerous charitable organizations in the communities we serve.

We proudly support both the SAIT and NAIT technologist training programs as just part of our ongoing commitment to professional development, and continuous quality improvement through education.
