

# Resources for Internationally Trained Technologists

## Living and Working in Canada

### Medical Radiation Technology Self-Assessment Tools

Readiness self-assessment tools for internationally trained medical radiation technologists (IEMRTs) who wish to live and work in their profession in Canada are available online through the Canadian Association of Medical Radiation Technologists (CAMRT) website. The purpose of these tools is to assist IEMRTs in identifying areas of knowledge and practice that should be considered so that they may have:

- a better understanding of Canadian practice in the profession
- a better understanding of the competencies required to work in Canada and expectations of employers
- assistance to identify areas for improvement to practice in Canada
- a more informed decision to immigrate and apply for certification in Canada
- assistance to identify available resources

These tools may be accessed through the CAMRT website: [click here](#)

## Academic Resources

### Northern Alberta Institute of Technology (NAIT)

#### Medical Radiological Technology Bridging Program

Courses available include:

- Patient Care
- MRT Occupational Terminology
- Orientation to Canadian Healthcare
- Canadian Radiation Safety
- Radiological Imaging Procedures
- Strategies for Writing the CAMRT MRT Exam

#### Medical Radiological Technology Review Program

Courses available include:

- Radiographic Anatomy
- Cross-sectional Anatomy
- Pathology
- Radiographic Technique
- Patient Care in Radiography
- Radiation Science and Apparatus
- Radiobiology and Protection
- Quality Assurance
- MRT Practice Exam

NAIT-related inquiries may be directed to:

## **Canadian Association of Medical Radiation Technologists (CAMRT)**

### **Exam Preparation Courses (online)**

There are three courses available to IEMRTs:

- Radiographic Procedures and Pathology (*applicable to radiological technology only*)
- Patient Management (*applicable to all specialties*)
- Radiographic Equipment and Imaging (*applicable to radiological technology only*)

These courses were developed with government funding, to help prepare the IEMRT for writing the certification exam.

### **CAMRT Practice Exam**

CAMRT has developed 100-question practice exams for each discipline as an exam preparation tool to assist candidates who intend to write the national certification exam in the specialties of medical radiation technology. Unlimited access to the practice exam is included in the exam registration fee.

## **Available Funding**
